SHARP
simply better **business**

Co-working space startup resolves print monitoring and chargeback facility to their customers with Sharp Color MFP with Accounting Software.

Relying on low-quality colour laser Printers/MFPs, a co-working space startup faced issues with monitoring and chargeback to various customers. With the help of high-quality Sharp A3 Color Laser MFPs combined with Accounting Software with Prepaid Wallet recharge/Postpaid facility, they were able to overcome the issues.

Industry

Co-Working Space/Business Centre

Challenges

- Print quality
- Monitoring and charging to their customers
- Higher operating cost with low-end printers
- Technology integration with the conventional MFPs

Solutions

Highest Configuration Sharp A3 Colour MFPs with accounting Software with Prepaid/Post-paid Currency Recharge option.

Benefits

- Complete monitoring of print usage
- Generate invoice any time based on usage
- Print from multi-location facilities.

The Challenge

The startup is into workspace solutions and provides plug and play workspaces across multiple locations. They provide all the facilities like Copy/Print/Scan with all other office equipment. It is difficult to monitor and chargeback to their customers based on usage of MFP.

Technology Solution from Sharp

Sharp has provided high-end Sharp Colour MFP DX-2000U with Accounting Software with Follow Me (Print from any location). Based on the usage they generate invoice and submit to customers. These MFPs can print from smartphones with Free Sharp Desk Mobile App (iOS, Android) which is available on the App Store.
