# International school resolves print management and chargeback to students based quotas with Sharp MFPs and Papercut software.

Thousands of students meant that the school needed a printing solution that would not only provide quality output but also help control print and copy spending. Sharp has given a solution with a multifunctional printer that includes print tracking and chargeback system based on usage.

## Industry

Education Segment

## Challenges

- Monitoring and chargeback to students
- Secure print
- Print quality of project reports
- Follow Me print at various locations

## Solutions

Highest Configuration of Sharp A3 Mono & Color MFPs and PaperCut MF Software with Centralized Monitoring Facility & Chargeback

## Benefits

- Complete monitoring of print usage
- Chargeback facility for student

## The Challenge

The school was using entry-level MFP. They were facing problems to monitor the print volume of students and chargeback.

## Technology Solution from Sharp

Sharp has installed 9 nos. (DX-2500-1, DX-2000U-1, MX-M264N-6, MX-4140N-1) of MFPs integrated with PaperCut MF Software and anywhere printing in the campus. PaperCut MF tracks all the print activity and generates monthly user reports for them.
