# Natural power to shield against bacterial or viral infections

Naturizer is a portable sanitizer maker that uses drinking water or bottled purified water and table salt to generate sodium hypochlorite water, nature's super powerful disinfectant.

## How it works

### Sanitized water contains

- 1: ClO<sup>-</sup> – Negative ion
- 2: HClO – Molecule
- 3: OH<sup>-</sup> (negative ion) as substances

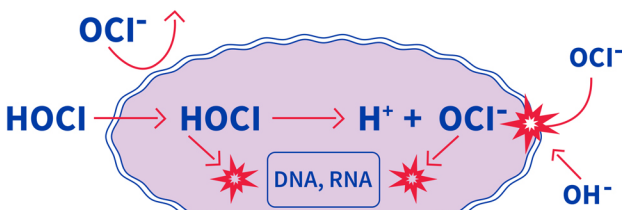

### Towards Bacteria (they have cell membrane)

- HClO goes through the cell membrane to oxidize and deactivate the protein and DNA/RNA
- At the same time OH<sup>-</sup> breaks the protein of the cell membrane from the hole, OCl<sup>-</sup> penetrates into the cell and does the same deactivation as HClO

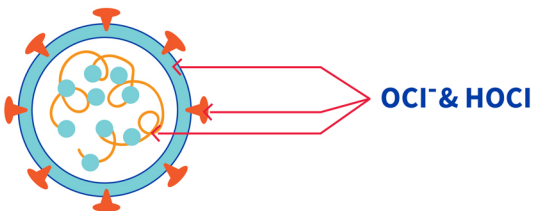

### Towards Virus (don't have cell membrane)

- Directly goes to oxidize and deactivate the protein/RNA (DNA) inside the virus

### Against bacteria that have cell membranes

### Against viruses that do not have cell membranes

## How it is made

### STEP 1:

Put 3 gms of table salt and 300 ml drinking water and shake it well.

### STEP 2:

Connect the USB cable provided with the product to the specified USB adapter (output: 5V/2A) and press the power button on.

### STEP 3:

When an electrical current is applied to the solution, the molecules break apart and the elements form a new molecule - Sodium Hypochlorite (NaOCl). Sanitized water is ready.

### STEP 4:

Spray on any surface to remove up to 99% germs and bacteria in 1 min.

## Advantages for your workspace

Naturizer Sanitizer Maker has multi-pronged benefits of use

### Germ-free

- Decomposes bacteria, virus, mold & bad odor
  - \*500 PPM+ Residual Chlorine effective against SARS CoV2
  - Bad odor removed swiftly

### Safe & Eco-friendly

- Saves 7500 plastic bottles of alcohol sanitizer
- 100% fire-safe & non alcoholic

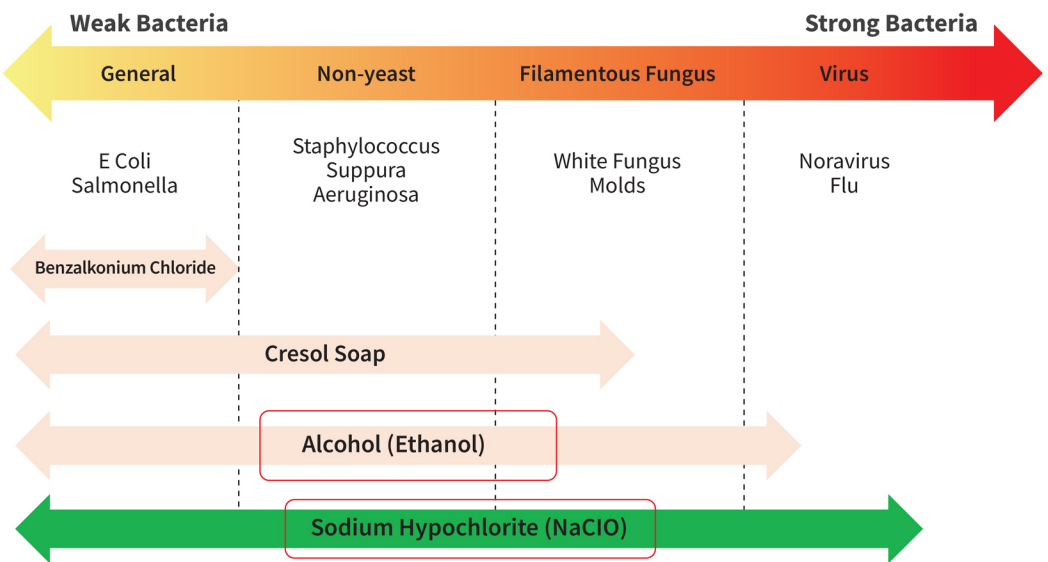

### Optimal Investment

- 5,000 times x 300 ml generates 1.5 million litre sanitized water
  - One-time investment
  - Almost zero running cost

## Easy- to-use across several applications

Offices	Homes
 Work Tables  Office Equipment	 Wooden Furniture  Kids Toys
 Cabins  Cafeteria	 Gadgets & Electronics  Toilet Interiors
 Meeting Rooms	 Home Appliances  Car Interiors
 Office Furniture	 Kitchen Area
 Front Desks	 Fruits & Vegetables

### Name

### Sanitizer Maker

Model

WJ-S30N-W

Power

Less than 10W  
Please use universal power adapter (5V/2A)  
which is not included in product

Material

Water bottle: PET/Sprayhead & bottombase: ABS

Package Dimension

96X96X300mm

Net Weight

185g

Operating Time

12 mins

Water Capacity

300ml

Temperature

10-38 deg C (room temperature)

Operating Environment

5 – 50 deg C, 45 – 90%RH

Residual Chlorine

500ppm+

Accessories

Salt spoon 1pc, USB C-type cable 1pc,  
Funnel 1pc, User manual 1pc

## Precautions

1. After spraying, wipe completely with cloth. Wipe products made of leather and metal gently with a piece of cloth, ensuring that no sterilized water remains on the surface.
2. Please use drinkable water or bottled purified water of 300 ml and 3 gms of table salt for effective sanitization power.
3. While using the product, please keep it on a horizontal and stable surface.
4. Do not spray electrolyzed water on eyes, mouth, or skin.  
Please rinse with pure water immediately and seek medical attention, if the water accidentally comes in contact with your eyes.
