

Top management institute improves print management and simplifies document imaging with Sharp MFP and Papercut software.

The Challenge

The institute was using entry-level MFP. They were facing problems to monitor the print volume of students and chargeback.

Technology Solution from Sharp

Sharp has installed MX-M315NV integrated with PaperCut MF for improved print tracking for both students and faculty. PaperCut MF tracks all the print activity and generates monthly user reports for them.

Multiple departments and thousands of students meant that the management institute needed a printing solution that would provide quality output but also help control print and copy spending. Sharp has given a solution with MFPs that includes print tracking and chargeback system to keep down the costs.

Industry

Education Segment

Challenges

- Monitoring and chargeback to students
- Secure print
- Print quality of project reports
- Follow Me Print at various locations

Solutions

Highest configuration of Sharp A3 Mono MFPs and PaperCut MF Software with Centralized Monitoring Facility & Chargeback

Benefits

- Complete monitoring of print usage
- Chargeback facility for student
- Expanding this facility for other departments and student hostels
