

Pharma company resolved high volume printing and Scanning problems with Sharp high-speed MFPs

Relying on low-speed MFPs, Pharma company was facing print quality issues and frequent breakdowns of MFP which affected office productivity. With the help of high-speed Sharp A3 MFPs, they were able to overcome these issues.

Industry

Pharma Company

The Challenge

Pharma company use to print high volume in R&D Department. The existing MFPs, were low end and were not able to take the required volume capacity and frequently use to breakdown which leads to reduction in the productivity.

Technology Solution from Sharp

Sharp has provided high end Sharp MFPs MX-M5050 (2nos) and MX-M356NV with high speed printing to take higher print volumes & high speed scanning for digitization with low operating cost and Data Security capabilities. These MFPs can print from Smart Phones with Free Sharp Desk Mobile App (Ios, Android) which is available on App Store.

Challenges:

- Print Quality
- Frequent breakdowns due to lower end printers
- Higher operating cost with low end printers

Solutions

Highest Configuration Sharp A3 MFPs with high-speed Printing/Scanning.

Benefits

- Complete monitoring of print usage
- Reduction of operating cost up to 20%
- Print from multi location facilities.
