

**Q**

How sure are you that your office documents are safe and protected?

**A**

Advance Security Solutions

Sharp Office Automation helps protect all critical and confidential data before, during and after usage with Secure Access, Data Encryption, Data Deletion and Data Initialisation –at the end of lease period. This allows only authorised users to safely copy, print, scan, and fax documents with total peace of mind.

**1**

Data Security Kit

Automatically encrypt job data prior to saving it to internal storage. Once a job is finished, that encrypted data is erased via multiple automatic overwrites.

2

Active Directory®

Enables integrated management of user credentials, thereby providing a highly secure and efficient environment for network administrators

3

Secure Socket Layer

SSL encryption prevents data leakage through the network when printing via IPP, browsing secure Web pages (HTTPS), or communicating via e-mail (SMTP and POP3) or FTP (FTPS).

4

Document Control

Prevents unauthorised copying, scanning, faxing, and ling of confidential documents by embedding copy-prevention data into documents.

5

User Authentication

Utilise account codes, user/group profiles, passwords, or external user accounts contained in an LDAP or external active directory server

6

Data Initialisation

Retained data can be erased when it's time to replace the MFP, preventing leakage of confidential information

SHARP BUSINESS SYSTEMS INDIA PVT LTD

How can I make my office documents more portable and accessible from office or from home?

Cloud and Mobile Connectivity

Connecting the MFP to one or more mobile devices or to public cloud is easy, and it expands your options for sharing data. Not only can you send scanned documents to mobile devices such as smartphones and tablets, you can also print documents or photos sent from those devices.
