

## Engineering design consulting firm resolves data security issues with Sharp Color MFP with DSK.

### The Challenge

An engineering design consulting firm based in the Middle East works for large infrastructure projects. Due to the increased usage of digital equipment/mobility/Cloud/Internet has led to data security concerns around IT Infrastructure in their organisation. MFP was one of the sources of data theft in their organization which had led to the loss of multi-billion-dollar projects.

### Technology Solution from Sharp

Sharp provided with the high-end Sharp Colour MFP MX-2640N with DSK. Any copy/Scan, a latent image formed in the Hard Drive. DSK encrypts HDD data and erases, Overwrite 7 times after Print/copy/scan/fax with support of DSK with 256 bit advanced Encryption Standard.

Relying on low-quality colour laser printers/MFPs, engineering design consulting firm, faced issues with data security in MFP. With the High Speed Color MFP with Data Security Kit (DSK) from Sharp, they were able to overcome these issues.

### Industry

Engineering Design Consulting Firm

### Challenges

- Data theft
- Security concerns over IT infrastructure such as MFP
- Technology integration with the conventional MFPs

### Solutions

Highest Configuration Sharp A3 Color MFPs with Data Security Kit.

### Benefits

- Secured access to Copy/Print/Scan with Access Control to MFP and Complete Monitoring
- Document Control (Unauthorized access to copy/Scan)
- Data encryption
- Data overwrite/erase
