

# PREVENT ODOUR AND CROSS INFECTION WITH SHARP.

## ABOUT HERE SOLUTIONS

A Netherland-based company that provides mapping and location data and other related services to individuals and automotive giants like Audi and BMW was facing air safety issues at their India offices. With a headcount of 4000 employees across India it operates from 11 offices; 8 of which are located in Mumbai and 1 each in Bangalore, Gurugram and Chennai.

## CHALLENGE

With the advent of the Corona pandemic, there were some concerns regarding cross-infection and working in close cooperation. Here Solutions India Pvt Ltd. have a large office of around 60000 sq feet in Mumbai where 600 people work in close proximity. Cross-infection and stale odour in the office was becoming a cause for concern.

## SOLUTION

154 sets of Ducted IG and 45 units of FU551KE were installed. Ion Density levels of 15000 per cubic cm was maintained.

## RESULT

The air became lighter and fresh. It was also devoid of any unpleasant odour. The high density of ions deactivated any traces of dangerous pathogens that were making the atmosphere unsafe.

## Special Comment

'The air feels much lighter and fresh and we feel really energized'.
